Project Title: Wes Anderson Website

I'd like to build my multipage website on Wes Anderson. He is most notably known for his colorful cinematography and visual style. I would like to highlight his achievements and legacy by showcasing his most well-known films and personal life/film career. There is plenty of content and imagery to build this website, and I'm planning on incorporating various film stills and photography.

1. Home Page – an introduction into the world of Wes Anderson; I would like to set the tone and visual style of his work
2. Personal Life
3. Film Career
4. The Life Aquatic with Steve Zissou
5. Moonrise Kingdom
6. The Grand Budapest Hotel
7. Sources
